Prepared Produce

This Month

BACK IN SEASON

October –Time for Change

The Summer has finished and we have pulled the slippers out for another season. September has brought mixed weather but good growing conditions for farmers. Personally, I love the Autumn season and produce wise we have some lovely options.

October is the beginning of the 'winter vegetable season', new season root crops such as **Parsnips, Carrots, Swede** and **Turnips** are young, tender and full of flavour. This month will see a change in the Country origin of most salad items, as **English** and **Dutch** produce will be replaced by **French, Spanish and Moroccan**.

The quality may be variable, and the prices will fluctuate during the cross-over but be assured that **Country Fare** works closely with supplier to ensure stability across core lines. When one seasonal door closes, plenty more open: **Figs, Dates, Local Potatoes, Squash & Pumpkins, Kale** and **Sprouts** are now available, you'll soon be in the mood for Winter!

Fresh October Update

Fruit & Salad

Local and English fruit begins to decrease over the next few months and has been good in quality and volume. This time of year we start switching over to imported fruit options. **Spanish Peaches, Nectarines and Apricots** have now ended, there are some pockets of availability, but the quality is not good, the next stone fruit available will be **Cape Produce** from South Africa; in November/December. **South African Lemons** are drawing to the end of the season, we will be switching to the **Spanish** supply. **Lemon** prices have been consistently high for the past 4 years, **European** supply will ease the price but we are not expecting cheap prices this season. Brexit added in a new dynamic where Turkey limited exports to the U.K. and send into Europe to avoid the extra costs with now sending produce to the UK. **New Forest Strawberries** will be available all month but due to the cooler weather, production is lower and punnet size will now be 227g punnets. **English Blue-**

English Apples

berries and **Blackberries** have finished and will be replaced with **European** imports for a short while, ending up with produce from **Peru** and **Mexico**. Our superb **Eng-**

lish Raspberries will finish this month and will be replaced with Spanish produce, which tends to be very average.

The **Easy Peeling Minneola** will be replaced with **Spanish Satsumas** during October. Apples available in October: **French Braeburn, Royal Gala, Golden Delicious** and **Granny Smiths** alongside English varieties like **Cox, Lambourne, Russets** and **Spartans**. The **Dutch** salad season will be coming to an end and we will be switching over to Spanish and French produce. Micro Herbs are available, please call telesales to place your orders. **Tomatoes, Cucumbers & Aubergines** have been expensive over the last few weeks as the Dutch growing season draws to an end.

Fennel

Fennel and White Chicory are great salad options for this time of year. Some of our local herbs may be replaced by imported products as the cooler weather slows the growing process.

Vegetables

All **root vegetables** are seasonally good at this time of the year, a must for any Autumn menu. Besides the traditional favourites like **Swede** and **Parsnip**; don't forget the often neglected roots like; **Turnip, Salsify, Jerusalem Artichoke** and **Celeriac**.

English Broccoli is getting easier with supply and price. **Cauliflower** is coming straight from the Isle of Wight, with excellent quality and low food miles! **Local Greens: Dorset Kale, Savoy** and **Primo Cabbage** or **New Forest Rainbow Chard** and **Cavolo Nero** will put an Autumnal flavour on any menu. **Winter Leeks** and new season **Brussel**

Sprouts are all plentiful. **Loose English Golden** and **Candy Beet-root** have started.

New Forest Crown Prince

Spout Tops are a fantastic winter green that will suit any seasonal menu. **Mixed**

Chantenay Carrots and **Piccolo Parsnip** are now available. **Vitelotte, Pink Fir** and **Ratte Potatoes** are very interesting heritage potatoes. Also available are **Italian Ceps, Polish Chanterelle, Trumettes, Portuguese Girolles & U.K and European Autumn truffles**.

Celeriac Root

Most of our local squashes start in October and will be available until mid December. Please do consider these for your Autumn menus.

Squashes

- **Gem Squash** (Short season) - small green squash. Ideal for filling, has a loose yellow flesh, similar to spaghetti squash.
- **Kabocha Squash** -medium size, dense orange flesh with a green or orange skin.
- **Crown Prince Squash** - Blue grey skin with a flesh similar to Butternut.
- **Acorn Squash** - green skin with a sweet yellow/orange flesh.
- **Onion Squash** - Small, orange skin and flesh.
- **Spaghetti Squash** - large yellow squash with a stringy flesh that can resemble spaghetti.

THE SPICY TABLE SAUCE MADE IN SHEFFIELD SINCE 1885

From home-cooked, family meals to Michelin star creations, our blend of tamarinds, cayenne peppers, vinegar, garlic and cloves adds a unique, spicy flavour to any dish.

Splash it on everything from poached eggs to shepherd's pie, or simply stir it into your favourite recipes. It's great for sauces, gravies, marinades and salad dressings. Even Bloody Mary cocktails too.

We're not *simply* an alternative to Worcestershire Sauce, Henderson's Relish is Sheffield's answer to it. So splash it on and find out what the locals have cherished for generations.

HENDO'S

A great-tasting, soya and potato popped snack. Perfect for a taste of Henderson's Relish on the go!

The ONLY Isle of Wight Extra Virgin Oilseed Rape oil!

ISLAND GOLD

Isle of Wight Grain is a Cooperative, representing Island farmers. We are proud to bring you this golden oil, produced exclusively from island grown rapeseed – bringing the taste of our sun-drenched isle to every drop!

By cold pressing the seeds, we are able to preserve the natural goodness and flavour of the oil inside. The result is a very different oil, of extra virgin quality, that has the lowest saturated fat of any oil, and a higher level of polyunsaturated fat which lowers cholesterol, and considerable more vitamin E than olive oil (and in many instances is considered superior due to its high smoke point, meaning it does not lose its nutritional credentials during cooking) – plus you can see it growing in our countryside.

Perfect for Cooking, Baking and drizzling

Now available in 500ml bottles

Now available in 5 Litre bottles

High cooking temperature - Rapeseed oil has a high smoke point, which means it won't burn until about 400 degrees F. That makes it a good choice for frying or roasting.

Mild flavour - Because rapeseed oil is almost flavourless, you can use it in a variety of dishes. It works great in dips, salad dressings, baking, pan-frying, and deep-frying. You can serve it at room temperature or cook with it.
