Fresh January Update

THIS MONTH
BACK IN SEASON

Plan and Prepare

The beginning of the year pricing can be notoriously unpredictable due to post Christmas shortages/gluts or severe weather conditions. However when planning menus choices for the start of the year, my advice is to keep your salad and vegetable options open and seasonal.

Country Fare Foodservice; are here to advise you throughout the year on menu choices and guidance. With many years of experience in the trade we are able to purchase effectively ensuring you get the best from local producers and produce markets across the seasons.

Our team are always on hand to advise and help you with your menu planning. Speak with telesales or your account manager.

Fruit

Citrus Fruits are excellent at this time of year, such as **Clementine's**. New Season **Cyprus and Turkish Grapefruit** have made an appearance in the markets. **Seville Oranges** are now available, the

season is very short. **Italian Blood Oranges** are excellent quality. Supplies of South African Cape **Apricots**, **Peaches**, **Nectarines** and

Cherries are available, however, supplies are not consistent and expensive. **Strawberries** currently from Egypt and Spain. This year 'New Forest Fruits' are growing a winter crop which will be available on a pre order basis. Pop Berry is the variety and it tastes and smells like mid summer fruit, they are worth a try! **Pomegranates** from Spain and **Figs** from Brazil are also right in the middle of the season and looking great this year.

Salad

Salads items are unseasonal products that we have got used to having on our winter menus. Why not replace these items with

seasonal alternatives. Swap salads with lettuce for roast vegetables with pulses, beans and grains. Add roasted sliced beetroot into burgers rather than tomato. There are simple switches to make which can also save money and improve GP.

Tomatoes, Peppers, Aubergines and **Cherry Tomatoes** are all still arriving from Spain and Morocco. We are stocking best brands where possible. **Italian Baby Leaf** is arriving 3 times a week for freshness and quality. **Italian Fennel, Chicory** and **Radicchio** are seasonally good this month and make great winter salads.

Vegetables

Spanish Broccoli and **Courgette** can be very unpredictable at this time of the year as they are susceptible to winter weather and our ever changing seasons. There are other cheaper seasonal alternatives for vegetables. Please call telesales to find out about our **Weekly Fresh Deals** that are available for Thursday to Saturday deliveries. **English Carrots, Parsnips, & Swede** are all excellent at this time of year and good value. **Hispi Cabbage** has moved over to Portuguese quality had been good and price is reasonable, **U.K. Savoy** remains better value currently.

Celeriac is an interesting root vegetable with a unique flavour and at its best, this comes without the top as standard, but we can order the full head with top, if required. **Cavolo Nero** and **Kales** are in good supply this year and are sourced from the **UK and Spain**. **Spanish Globe Artichokes** represent good value and pack plenty of peppery taste. Say goodbye to **Brussels Sprouts** as the season draws to an end. **Tenderstem Broccoli** remains good quality and we are working with our supplier to maintain a good price throughout the month. **Rainbow Chard** from Italy is also in the middle of the season.

Recycling Boxes

Yes! We do reuse boxes- please give them to your delivery driver. Unfortunately we cannot accept wet or damaged boxes.

Forced Rhubarb

Grown and harvested in the dark, **Forced Rhubarb** is known for its delicate flavour and striking crimson stalks, but it is a fragile crop with few growers left. Unlike outdoor varieties, forced roots are grown in fields for two years, where they store energy and are moved into forcing sheds after November frosts.

They are then grown in complete darkness and harvested by candlelight, to avoid photosynthesis turning them green and tough. This product is only available for a few months.

Potatoes

We have seen a vast turn around this season with positive yields from Farmers after the Autumn harvest. All potatoes are now stored in temperature controlled areas to last through the winter and spring.

Prices have reflected this as well and we have seen a welcome return to affordable produce through the Autumn and Winter so far. Quality has also been good with very little defect or dehydration caused from the summer heat wave.

CORNWALL GOLD

INDULGENT GOLD TOP

Our 5% fat Cornwall Gold milk delivers the rich, indulgent taste you'd expect from traditional gold top milk, but with a smooth, creamy texture from the top layer of cream being perfectly blended throughout. The result is a beautifully balanced golden milk that captures all the goodness of Cornwall's lush pastures in every sip, delivering that premium gold top experience with a rich, creamy consistency from start to finish.

100% CORNISH MILK

Made from the finest Cornish milk, from cows grazing within 25 miles of our dairy, this is a modern take on a classic. Whether you're enjoying our Cornwall Gold straight from the glass or elevating your morning cereal to something truly special, our gold top milk is perfect for those who appreciate a moment of luxury in their everyday.

COWS FREE TO GRAZE

Our Cornish dairy cows (which include Jersey cows) are famed for producing some of the richest, most golden milk. They have been grazing Cornwall's coastal pastures for generations, naturally producing milk with a higher butterfat content. It is the teamwork between us and our farmers which ensures the cows have the right diet, care and attention to produce perfectly balanced milk every time.
