Our outstanding Cheddar is the best of the best, the cheese that our grandmother Ivy kept back for her own table.

Now the world's first carbon neutral Cheddar, it's still made to the recipe she perfected almost a century ago, specially selected and aged for up to 18 months under wood until it takes on a very particular creaminess, complexity of flavour and nutty, rounded finish.

SMOOTH. CREAMY. MOREISH.

Full of flavour.

£11.95

1.2kg

Our smooth, creamy and deliciously moreish take on traditional red cheeses comes from a family recipe perfected over decades in Ivy's dairy. Just like our vintage Cheddar, it's certified Carbon Neutral by The Carbon Trust and made the right way on our Somerset farm, then aged for up to 12 months to bring out its rich, nutty flavour and delightful texture.

The world's first carbon neutral Red.

End of Season

Sadly we must bid farewell to **Local and UK grown Asparagus**, this has finished a little early due to the hot spell of weather we had to wards the end of the growing season.

Jersey Royals are now finished and we move over onto the amazing **Norfolk Scrapers**. These are lifts and packed daily so super fresh.

FRESH PRODUCE MARKET REPORT

Browns Farm (Arreton)

We enter our second season working with the excellent family Browns (Arreton Produce)

They grow excellent produce in the heart of the island which benefits from great temperatures and excellent soil. This allows them to grow **Brassicas** such as **Green and Purple Hispi**, **Romanesco**, **Fresh Sweet Corn**, **Baby Veg** such as **Kohl Rabi** and **Fennel** and excellent scrapping potatoes.

We love all their produce and it helps squash food miles...

Fruit & Salad

We see the arrival of 'Dorset Blues' the **Local Dorset Blueberry**, from '**Brothers Farm**' in Wimborne, the first commercial grower of Blueberries in the UK. This award winning blueberry will be available from the middle of July for

6 weeks; depending on the weather, get them while you can! Fantastic **Local New Forest Strawberries** and **UK Raspberries** are still

available, freshly picked every day. **Local New Forest Tayberries**, this heritage berry can be described as a cross between a blackberry and raspberry and is available in July but only for a very short period. **Local Blackberries** will also start in mid July. English **Green Gooseberries** will end shortly, **Dutch** or **English Red Gooseberries** are still available. **Donut Peaches** are now available, alongside

New Forest Tayberry

blood peaches and **flat nectarines** **English Cherries**

grown in Wye Valley are sweet, plump and juicy, these will be available this month

New Forest Gooseberry

with local towards the end. In the next few weeks we should see the first **Greengages** and **English Victoria Plums** enter the market. **Spanish Melons**, **Turkish Figs** and **Spanish** or **Egyptian Grapes** are all good value. **Citrus**; **Oranges**, **Lemons**, **Limes** and **Grapefruit** are all still arriving from the southern hemisphere.

Micro Herbs and flowers grown in Britain by **Westlands**.

They grow and supply an extensive range of micro herbs, flowers and inspired leaves. Also in season now are amazing **Courgette Flowers** and **Monks Beard** from them.

French Mixed Bunch Radish

Vegetables

New season **English Chantenay**

Carrots have started and looking great. New season root vegetables; **Swede**, **Parsnip** will start shortly but the roots will be small to start. **Brittany Globe Artichokes** are excellent, fresh and full of heart - if you prefer a smaller Artichoke, try the **Baby Violet** **Artichokes**. **English Peas** in the

Grolle Mushroom

Pod are bold, as are **Broad** and **Runner Beans**. **Italian Borlotti Beans** are again starting shortly. **Local Romanesco**, **Rainbow Carrots** and **Rainbow Chard** have also started. **UK Hispi Cabbage** has a good heart, with a tender and subtle flavour. We also have some excellent local **Spring Greens** grown by Haywards, these are excellent

Italian Borlotti Beans

value and full of fibre. Wild Yellow **Grolle Mushrooms** are available now and should carry on into December. **Kohlrabi** is now in season. **New season carrots** don't hold up well in heat and can suffer with

black marks. This does look unsightly, however is superficial, once peeled it does not affect the eating quality. **New season Spanish onions** have started and skins are now set. Both **U.K. Broccoli** and **tender stem** is good value. **Romanesco**, **purple**, **white** and **orange cauliflower** is all looking great **British**.

We are approaching the end of the **2025 potato crop**. This seasons planting was early due to perfect conditions. The weather through spring has been warm and dry. Currently keeping crops watered is the main challenge. Mother nature throws what she wants at growers through the season, a positive start can soon follow with other issues later through the growing period. Although warm dry conditions are good for us personally, water storage in the U.K. is not an area with enough investment. Growers and farmers will need to look ahead to chang-
